JAVARUSH UNIVERSITY

Certificate

Evgeniy Samsonov

has successfully completed the online course:

Development with Claude Code

Spec-driven development with AI agents. The developer defines intent and quality criteria, orchestrates agents and verifies results.

Key skills

1. Defining tasks with specifications and acceptance criteria
2. Analysing codebases, managing context and planning work
3. Extending Claude Code with skills, plugins, MCP servers and hooks
4. Coordinating agents and controlling their autonomy and permissions
5. Maintaining code quality through review, testing and safe refactoring
6. Building team workflows around pull requests, CI/CD and releases

Hands-on experience

Taking project tasks through to verified results with agents, starting from unclear requirements and unfamiliar code and revising the plan as needed.

Course duration: 3 months
Issue date: 12 Oct 2026

Dmytro Vezhnin
CEO of JavaRush

Nelli Efremyan
Mentor of JavaRush
